

TSM CONSULTZ

HotelOps / PM Incident Packet

Synthetic property operations case designed for priority, SLA, escalation, and mission tracking

SYNTHETIC DEMONSTRATION PACKET

Designed to demonstrate TSM Neural Core document intelligence, case creation, prioritization, explainability, decision support, delivery packaging, HITL governance, mission tracking, and executive rollup.

01 — Guest / Property Incident

Field	Synthetic Value
Property	Desert Ridge Suites — Scottsdale
Incident ID	OPS-2026-00841
Room	418
Guest	SYNTHETIC VIP GUEST
Check-out	08/21/2026
Issue	HVAC failure
Reported	08/20/2026 10:14 AM

02 — Guest Message

“The room is extremely hot and the air conditioning has stopped working. We are scheduled to leave tomorrow morning, but this needs to be fixed today.”

03 — Maintenance Ticket

Field	Value
Ticket	MNT-418-2026
Fault Code	HVAC-E7
Status	OPEN
Technician Note	Compressor/control component suspected
Parts	Replacement control component required
Last Update	10:32 AM

04 — Vendor SLA

Requirement	Value
Vendor	Desert Air Mechanical
Priority	Emergency
Response SLA	4 hours
Dispatch Window	10:45 AM–2:45 PM
Escalation	Property Manager if no dispatch confirmation

Vendor agreement specifies emergency HVAC failures affecting occupied rooms require same-day response.

05 — Property Manager Note

“Guest is marked VIP. Please prioritize. If repair cannot be completed today, identify an approved room-move option and notify front desk.”

DEMO TRIGGER: TSM must correlate guest impact, VIP status, maintenance severity, vendor SLA, and check-out timing.

TSM Expected Output — Executive View

TSM Field	Expected Finding
Priority	CRITICAL
Operational Impact	Occupied VIP room without HVAC
SLA	4-hour emergency response
Vendor	Desert Air Mechanical
Mission Owner	Maintenance Coordinator
Recommended Action	Dispatch emergency HVAC vendor immediately; prepare approved room-move fallback if repair cannot be completed today.
Escalation	Property Manager
Mission State	Detected → Assigned → Dispatched → Resolved → Verified

Wow-factor: This demonstrates TSM moving beyond document extraction into operational mission management, escalation, ownership, and executive visibility.
